

The Charms Bar

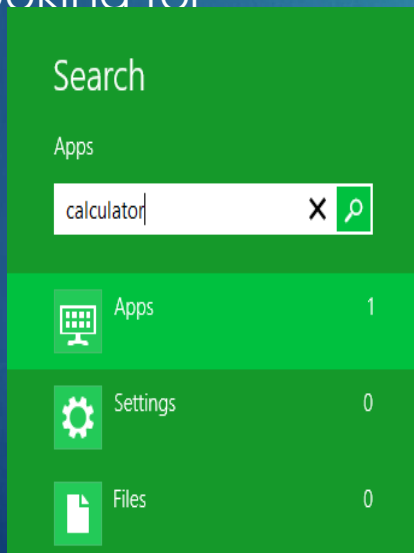

The **Charms bar** is a toolbar that lets you **access your computer's settings**, along with other options. You can access the Charms bar by hovering the mouse in the **top-right or bottom-right corner**.

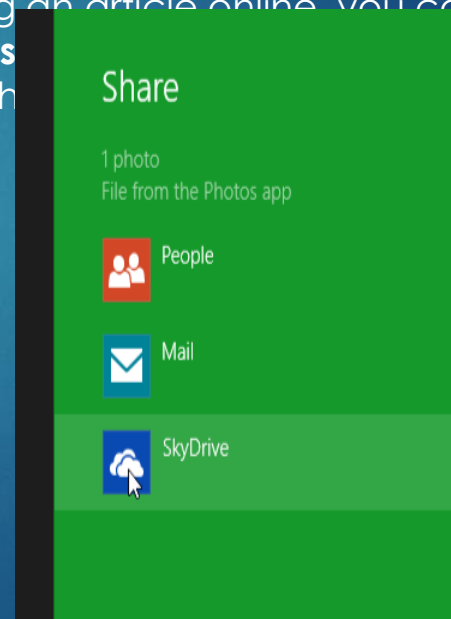

The Charms Bar: Charms

Search: The Search charm lets you **find apps, files, or settings on your computer.** However, a simpler way to search is to go to the Start screen and type the name of the file or app that you're looking for.

Share: The Share charm is basically a **copy and paste** feature that is designed to be as convenient as possible. It allows you to "copy" information (such as a photo or web address) and "paste" it into another app. For example, if you're viewing a photo in the Photos app, you can **share it with the SkyDrive app**, which will upload the photo to your SkyDrive. If you're reading an article online, you can **share the address** with an email app, which lets you email the address.

The Charms Bar: Charms

Start: This switches to the Start screen. If you're already on the Start screen, it will open the most recent app.

Devices: This shows any hardware devices that are connected to your computer, such as printers or monitors.

The Charms Bar: Charms

Settings: This lets you access general settings for your computer, as well as settings for the app you're currently viewing. For example, if you're in Internet Explorer, you can go to the Settings charm to access your Internet Options.
