

Navigating Windows 8

There are several ways to navigate through Windows 8, including **hot corners**, **keyboard shortcuts**, and **gestures** if you're using a tablet

Using Hot Corners

Lower left: When you're using an app, you can click in the **lower-left corner** to switch back to the Start screen

Upper left: If you click in the **upper-left corner**, it will switch to the **previous app** that you were using.

Navigating Windows 8

Upper right or lower right: You can hover the mouse in the upper-right or lower-right corner to open the **Charms bar**, which you'll use to adjust your computer's settings, manage printers, and more. We'll talk more about the Charms bar later in this lesson.

Navigating Windows 8

If you have several apps open, you can switch between them by hovering the mouse in the upper-left corner and then moving the mouse down. This displays a list of all of your open apps, and you can click the desired app to switch to it.
